

60310 Colophony Powder

Colophony powder is a mixture of 80 % colophony extra light and 20 % talc. Colophony is the residue remaining after distillation of the volatile oil from the oleoresin obtained from various species of Pinus. Talc is a powdered, selected natural hydrated magnesium silicate.

Product Specification

CAS No:	8050-09-7
EINECS:	232-475-7
Appearance:	almost white powder
Components:	80 % colophony, extra light 20 % talc
Storage conditions:	store under dark, ambient and dry conditions
Shelf-life:	3 years
Uses and application:	component for base cements or fertilizers
