

## O60441 Shellac light, wax-free, decolorized, food quality

## **PRODUCT SPECIFICATION**

| CAS No.:                | 9000-59-3   |
|-------------------------|---|
| Appearance:             | Yellow to brownish-orange shining, translucent, hard or brittle, more or less thin flakes   |
| Solubility:             | It is freely (slowly) soluble in alcohol, insoluble in water and slightly soluble in acetone and ether                                    |
| Storage and shelf life: | 2 years under dark, cool and dry conditions. Store in well closed containers at max. 20°C. Product tends to black at higher temperatures! |

| Parameter            | Method of Analysis           | Specification | Unit       |
|----------------------|------------------------------|---------------|------------|
| Color                | Lovibond PRS, 20% in ethanol | 1 – 1.75      |            |
| Acid value           | DIN EN ISO 2114              | 60 - 75       | [mg KOH/g] |
| Saponification value | DIN EN ISO 3681              | 175 - 240     | [mg KOH/g] |
| Loss on drying       | USP                          | ≤2            | [%]        |
| Wax content          | USP                          | $\leq 0.2$    | [%]        |
| Lead content         | USP                          | ≤2            | [ppm]      |
| Rosin                | USP                          | corresponds   |            |
| Melting temperature  | PH.EUR.2.2.14                | 65 - 77       | [°C]       |

Shellac (E904) is an approved food additive according to Annex II of the EU Regulation 1333/2008. This product meets the specifc purity requirements according to the EU Regulation 231/2012 for Shellac as food additive.
