

41050 Cassel Brown

Cassel Brown comes from the natural material (raw material oxyhumolite) due to the extraction with alkaline solution.

Technical Data:

Humic acid in dry matter:	min. 65 %
H ₂ O in dry matter:	15 – 30 %
Content of ashes in dry matter:	15 – 35 %
pH-Value:	9.5 – 12
Water solubility:	98 – 100 %
Bulk density:	500 – 600 g/l
