- Super absorbent
- Super soft
- Lint free
- Durable
- Labour saving
- PVA Material
- Resistant to oil and grease
- Machine washable
- Biodegradable
-

When hardened, simply resoak the sponge in water, moisten and squeeze out before use.

The sponge is made of Polyvinylalcohol. It has a special, three-dimensional structure which resembles that of natural sponges. This structure is responsible for the excellent absorption. The sponge can be used with normal cleaning agents. It can be used at least for two years.
