*This product contains airborne quartz powder as impurity and is therefore classified as STOT RE1 according to EG Regulation 1272/2008.*

*Additional toxicological information:*

*No health impairments known or expected when used according to specifications.*

*Frequent or repeated inhalation of airborne quartz powder (crystalline silicate) can cause silicosis.*

*The IARC (International Agency for Research on Cancer) notes that crystalline SiO<sub>2</sub> which is inhaled at the working place can cause pulmonary cancer.*

*However, they further note that it does not apply for all working places and not all types of crystalline SiO<sub>2</sub> (IARC-Monographs, 1997, Vol. 68).*

*In June 2003 the SCOEL (EU Scientific Committee on Occupational Exposure Limits) came to the conclusion that silicosis is the major effect of inhaling respirable crystalline silicon dioxide.*

*Persons who already are suffering from silicosis have a higher cancer risk. The symptoms of silicosis are coughing and breathlessness. The dust level should be measured and controlled continuously.*

*It can therefore be concluded that the risk of cancer can be reduced by avoiding silicosis (SCOEL SUM Doc 1994-final, June*
