

23660 Perm Yellow H5G

Pigment Yellow 213, C.I. 117875

Monoazo pigment of the quinoxalinedione range.

Perm Yellow is a greenish yellow pigment with high purity and excellent color strength. Noted for high heat stability and outstanding solvent fastness.

With its outstanding weathering fastness and its semi-transparent full shade, it is suitable for solid shades as well as for effect shades in the yellow, orange and green range.

Physical Properties

Density:	1.52 g/cm ³
Specific surface area:	22 m ² /g
pH Value:	5.5 – 8.5
Particle size:	210 nm
Heat stability:	200°C

Fastness Properties

Acid:	5
Alkali:	5
Butyl glycol:	5
Xylene:	5
MEK:	5
Butyl acetate:	5
