

K11415 Bianco San Giovanni

Made from high purity white hydrated lime. Is gently dewatered and dried. The product is ground to a fine 150 µm.

The pigment, being made from marsh lime, may be slightly alkaline. When used in oil, this pigment must be rubbed particularly carefully, otherwise drying problems may occur during processing.

We recommend the coarser grind only for use in plaster.

Technical Data

Optical: pure white
Grinding: < 150 µm

Safety precautions:

Caution. The product may irritate the skin, eyes and respiratory tract.

Avoid contact with skin and eyes. Do not eat or drink while working.
