Indoor digital thermometer and hygrometer Airbi DIGIT

Key features

- Measures room temperature
- Measures room humidity
- Time
- MAX/MIN values
- Alarm with snooze function

Description

Digital thermometer with hygrometer **The Airbi DIGIT** measures the room temperature in the range of 0 ° C to + 50 ° C and room humidity in the range of 20-95%. The display of the device is divided into two halves -**the upper part shows the temperature, the lower part shows the measured humidity and the current time.** An additional function of the clock is the possibility to set a clock notification (beep). You can also display the current date instead of the time for a few seconds by simply pressing the button. The date and time are set manually on the device.

The Airbi DIGIT remembers the measured minimum and maximum values since the last manual reset. An alarm can also be set on the device, which offers the possibility of a repeated alarm (snooze function - delayed alarm for 8 minutes). The user has the option of displaying the temperature in degrees Fahrenheit or Celsius.

Technical parameters

Temperature measurement range:	Base station: -10 °C … +50 °C Sensor: -20 °C … +60 °C
Humidity measurement range:	Base station and sensor: 20-95 %
Temperature measurement accuracy:	+/- 1 °C (0 °C…+40 °C), otherwise +/-2 °C
Humidity measurement accuracy	+/- 5 % (40…80 %)
Power supply:	Base station: 3x 1,5 V batteries AAA (not included) Sensor: 2x 1,5 V batteries AAA (not included)
